Summary

Full-stack Software Engineer with 4 years of hands-on experience across **iOS, Android, backend, and web**. Specialized in React, React Native, Next.js, Node.js, Firebase, and cloud-native architectures for scalable B2B/B2C apps. Delivering cross-platform solutions that blend thoughtful UI with robust, automation-ready backends to drive engagement, reliability, and speed to impact.

Core Technologies

React, React Native, Next.js (SSG/ISR/SSR), Node.js, Express, Firebase, Supabase, TypeScript, JavaScript, HTML5, CSS3, Tailwind/Nativewind CSS, MongoDB, JWT, REST APIs, Python, Google Cloud Platform, AWS, Selenium, Unreal Engine, TestFlight, Google Play Console

Experience

Full-Stack Software Engineer (Web, Backend), Overview — Dec 2023 • Present

- Architected a modern Next.js platform using SSG, ISR, and SSR to optimize performance and cost
- Conceived, architected, and implemented digital editor in chief that resulted in an increase of 30% in user engagement
- Built internal tooling (Next.js/React) that improved observability and cut debugging time by 50%
- Researched and implemented translation optimizations resulting in 90% reduction in operating cost while improving translation quality with Node.js

Full-Stack Software Engineer (Web, Mobile), DPD Framework — Apr 2025 • Present Contract Position

- Implemented 3D custom user interfaces using React Native, Reanimated, and React Three Fiber
- Designed scalable Firebase data structures to support multi-tier professional organizations and fast data delivery
- Cut operational workload by 90%+ via automation pipelines and internal tooling

Experience (Continued)

Full-Stack Software Engineer (Web, Backend), Fiverr — Dec 2023 • June 2024 Freelancing Contracts

- Built production web apps for SMB clients with Next.js (App Router) and React 18; shipped responsive UI's using modern HTML/CSS and accessibility best practices (WCAG)
- Designed secure API routes and server actions; integrated Supabase (Postgres, Auth, Storage) and Firebase (Auth, Firestore/RTDB, Cloud Functions) for authentication, data, and file workflows
- Implemented SSR/ISR/SSG strategies in Next.js to improve SEO, first render, and cache efficiency across marketing and app surfaces

Full-Stack Software Engineer (Web), Pre Framing Corp — Mar 2023 • Jun 2024

- Trained and integrated Google Vertex AI (AutoML) to improve image/PDF data extraction; led OCR research and integrations
- Converted legacy codebases and shipped quality iterations with an international team
- Built React/Next.js UI components and an Android app (Unreal Engine) with AWS patching for B2B construction software

Full-Stack Software Engineer (Web), MinuteZero — Feb 2023 • Aug 2023

- Prototyped startup website (React/Next.js), iterating with the founder to refine user journeys and design
- Built a custom data-extraction app leveraging Google Custom Search, PipFeed Article API, and Hunter.io to streamline workflows
